The Acoustasonic™ 40 amplifier offers portable amplification for acoustic-electric guitar and microphone. It's a simple, flexible "grab and go" solution for a variety of musical performance and basic public address applications, and it can also be used as an onstage monitor when combined with a PA system.

### Features Include:

- 40 watts of output power
- Two 6.5" Special Design full-range speakers with whizzer cones for enhanced high-frequency response
- Two channels, each with combination XLR and 1/4" inputs for choice of instrument or microphone
- Three-band equalizer controls for each channel
- Digital hall reverb with level control for each channel
- Headphone output
- Auxiliary input for use with external audio devices
- XLR line output for use with PA system or recording gear
- Vintage-style brown textured vinyl covering
